

A: to run a python script in django background, try this from threading

```
import Thread
import sys
#Run your python script in the background
def job(arg):
    #print info to stdout
    sys.stdout.write('Calling thread... ')
    sys.stdout.flush()
    #call the job function
    my_thread = Thread(target=job, args=arg)
    my_thread.start()
    sys.stdout.write('Ending Thread... ')
    sys.stdout.flush()
if __name__ == '__main__':
    #start jobs
    jobs = [job(1), job(2), job(3), job(4), job(5), job(6), job(7), job(8)]
    #start main thread
    jobs.append(Thread(target=MainThread, args=None))
    jobs.append(Thread(target=MainThread, args=None))
    #join threads
    for job in jobs:
        job.join()
    #stop killing thread
    sys.stdout.write('End Killing Thread... ')
    sys.stdout.flush()
```

But looks can be deceiving. Going back to the stream-of-consciousness to think that we live in the blink of an eye. For me, this comes across as a poem but I am putting my thoughts on your lovely blog about two current events in the headlines at the moment: The Woolwich Soldier, the Muslim, the Soldier's name is given as 'Furqan' The Woolwich soldier, who was reportedly a 'hero', killed a Muslim soldier with a knife and had his head cut off. Then we come to the 'Muslim Man' Muslim Man rushed at white soldier with bread knife Muslim Man came out from Muslim area with big knife and F... Ced him Who can blame the soldier for acting in self-defense? Except for the fact that, as 3e33713323
